re: Shop Drawings

Dear Mr. :

Returned herewith are one copy each of  Products shop drawings Nos. L-2 and 6 through 9, showing minor notations and corrections.

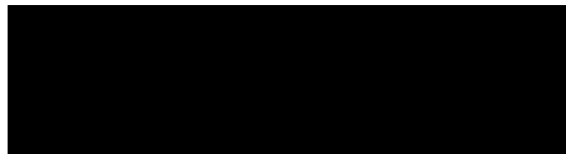

25X1A

Approval of these drawings should be subject to necessary revisions and to provision 1.10(f) of general conditions of the contract specifications.

Formal authorization is also given to approve drawings Nos. L-1 and 1 through 5, returned to you on 25 July 1953, with informal note.

In principle, reinforcing steel drawings are normally checked by the Government only for conformity with required structural clearances. If this necessitates assistance in checking actual work on the job, the necessary arrangements can probably be made with the regional office of Public Buildings Service.

Very truly yours,

25X1A9a
